

# GET STARTED

**KONNEC**

ADVANCING THE NORMAL

## Get the Card

Contact us to order your card, and we will start the process of setting up and designing your card.

.....

## Create a Profile

Create a Username and password, and submit. After registration, you will be able to log in to your new account and access your profile. .

.....

## Get Konnected

Once your card is registered to your profile, you can share your info.

Simply tap it to any NFC enabled Phone, tablet, or PC and follow the link. Click download at the bottom of the page, and the client can import your contact Information.

.....

**Just One Tap** to share your contact information, social links, and more. No need for hundreds of printed business cards a year, that gets lost before your contact information can be used. With Konnec you can save your information directly to their phone, with just a click - no app needed.

### STEP 01

### STEP 02

## Register Your Card

Simply tap the card against your phone and open the link with your browser. If the card has not been linked, it will take you straight to the registration page.

.....

### STEP 03

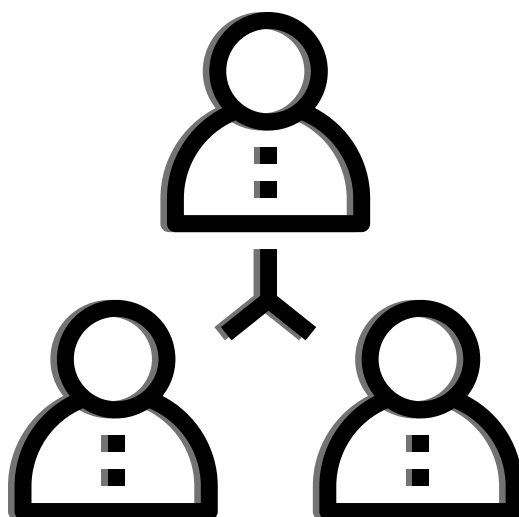

## Enter Your Information

Go to your new account and update your profile. Add a profile picture, and fill in only the fields that you would like clients to see when tapping your card. Make Sure to save your changes before leaving.

.....

### STEP 04

### STEP 05

# WITH CLIENTS

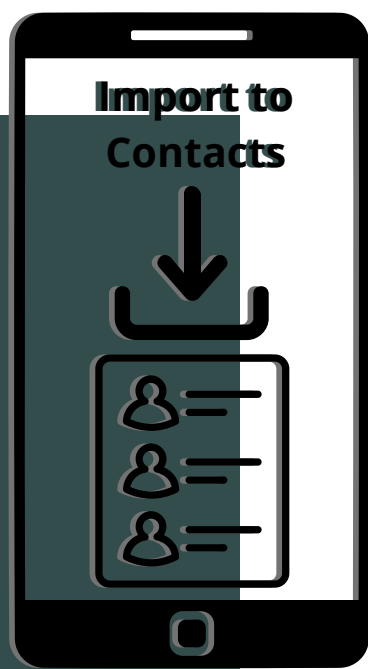

## Tap the Card

Tap your card to any NFC enabled phone. Usually in the middle at the back for Android devices, and at the top in the front for Apple.

## Download File

Your profile with contact information will appear. Scroll down and click on the download button. This will download the .vcf file with your contact information, ready to be stored correctly on the phone.

## Get Connected

Once you selected the "import" option, your information will automatically be stored in the correct format on the phone.

Your information will now be where the client will look for it first, in their phone, ready to Konnect with you.

STEP  
01

STEP  
02

## Select the Link

A pop-up will appear on the phone, requesting to open a link with a browser. Select the browser of choice to go to your Konnect profile.

STEP  
03

STEP  
04

## Import the File

Click on the notification showing the download is complete, or alternatively go to the "Downloads" folder. Find the downloaded file, it will typically be at the top and look something like "YourName.vcf". Click on the file and select "Import".
